

DESCRIPTION:

Rymax Engine Flush is a specialty product consisting of highly effective cleaning detergents which is to be used prior to regular oil changes. It removes gums, varnish, sludge and contaminants like carbon deposits and cleans the oil system for optimum performance.

How to use?

- Start by adding the entire contents of one bottle to the crankcase of a warm engine before performing an oil change.
- Allow the engine to run for 15 minutes, alternating between low and high RPM.
- After the engine has run for 15 minutes, drain the oil from the crankcase.
- Replace the oil filter with a new one.
- Finally, refill the crankcase with the recommended fresh motor oil.

Note that these instructions are intended for all types of engines, including gasoline, diesel, and LPG engines, and apply to both turbocharged and non-turbocharged engines. Additionally, this product is compatible with mineral, synthetic, and fully synthetic motor oils.

Dosage

One bottle treats a crankcase of 3 to 6 litres.

BENEFITS:

- Thoroughly cleans and flushes the engine using powerful cleaning agents.
- Removes harmful deposits such as gums, varnish, and sludge from internal engine components.
- Effectively eliminates contaminants like carbon deposits, soot, and residual liquids such as water and fuel.
- Helps restore the engine's optimal condition, leading to reduced fuel consumption and exhaust emissions.
- Enhances the performance of fresh oil by enabling it to function at its best.

These benefits highlight the product's ability to clean the engine, remove unwanted deposits, and improve overall engine efficiency, resulting in reduced fuel consumption and emissions while optimizing the performance of the fresh oil.

TYPICAL PROPERTIES

	Unit	Engine Flush
Density	g/cm ³	0.874
Colour		Lightish Brown
Flash Point	°C	200
